Final-year Informatics student with a strong foundation in Full Stack Web Development. Experienced in managing end-to-end development lifecycles, from database schema design to frontend integration. Committed to delivering scalable code and solving complex technical problems.

EDUCATION

Bachelor of Informatics | Universitas Islam Indonesia

- GPA: 3.53 / 4.00

2022 - Present

TECHNICAL SKILLS

- Programming languages: Python, JavaScript, Java, C#, Kotlin, HTML5, CSS3.
 - Frameworks: Django.
 - Databases: PostgreSQL, MySQL.
-

PROJECTS

Chesstify - Chess Database Management & Game Analysis Web Application for Professionals

Python (Django) | JavaScript | HTML | CSS | PostgreSQL

Individual project as Full-Stack Developer

- Engineered a robust PGN management system supporting bulk file uploads, metadata parsing, and advanced filtering for professional game archives.
- Built structured database features for game storage, retrieval, filtering, and position-based analysis.
- Integrated Stockfish 17 chess engine using WebAssembly (WASM) and Web Workers for real-time, client-side position evaluation without server latency.
- Built a dynamic Analysis Board featuring branching move logic, visual move markers, and drag-and-drop interactivity.

Carbonea - Eco Friendly Activity & Health Tracker

Kotlin | Firebase | HTML | PHP | Google Maps API

Team project as Front-end Developer

- Designed intuitive dashboards for "Carbon Tracker" and "Health Tracker", visualizing complex environmental impact data (CO2 savings) into cards and stats.
- Built gamified UI modules for the Leaderboard and Ranking System, including animated progress bars for "Weekly Challenges" to drive user engagement.

ANOMALI - Dungeon Adventure Game

Unity | C#

Team project as Conceptor and Game Developer

- Engineered core C# scripts for player movement (walk, jump physics) and a dynamic flashlight/lighting system crucial for the game's horror atmosphere (Limbo inspired).
 - Designed the initial level architecture and environmental obstacles, creating a linear semi-pixel world filled with traps and enemies.
-

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Publication & Design	Porsematik, Universitas Islam Indonesia	2023
Publication & Design	PETA FTI, Universitas Islam Indonesia	2024
Head of KKN Unit 31 Ull (Kuliah Kerja Nyata)	- Kotabaru, Yogyakarta	2025
- Led a multidisciplinary team of 11 students to execute community development programs in Kotabaru, Yogyakarta. - Collaborated developing a Web-Based Dashboard for LLT Kotabaru as the local elderly care organization to digitize administrative records (Back-End Development focused). - Managed project timelines and coordinated with village officials to ensure successful program implementation. - Resolved conflicts within the team and facilitated effective communication between students and the local community.
